Se il codice di albero a camma in posizione 2 è lo stesso della posizione 1 gli alberi a camma sono uguali, altrimenti il secondo è più corto.

If the article code in position 2 is the same given in position 1, it means that two cam shaft are equal, if the code is different, the position 2 is shorter than position 1

Wenn die Artikelnummer der Nockenwelle in position 2 die selbe der position 1 ist, dann sind die Nockenwellen gleich, Anderfalls ist position 2 kuerzer als position 1.

Si le code du arbre à cames dans la deuxième position est le même du première, les arbres à cames sont égal, sinon le deuxième est plus court.

Se il codice di albero a camma in posizione 2 è lo stesso della posizione 1 gli alberi a camma sono uguali, altrimenti il secondo è più corto.

If the article code in position 2 is the same given in position 1, it means that two cam shaft are equal, if the code is different, the position 2 is shorter than position 1

Wenn die artikelnummer der nockenwelle in position 2 die selbe der position 1 ist, dann sind die nockenwellen gleich. Anderfalls ist position 2 kuerzer als position 1.

Si le code du arbre à cames dans la deuxième position est le même du première, les arbres à cames sont égal, sinon le deuxième est plus court.
